

Juwel 18 L

Dough sheeter Juwel 18 L

1 Machine description

The **Juwel 18 L** is perfect in operation and capacity. The machine is equipped with robust and maintenance-free motors, clearly arranged scales with additional marks and switched by switch- resp. safety-guards. Technical details which proved to be successful in practice such as the smooth roller adjustment or the change of the running direction of the switchguards above the rollers have been taken over the new models but in modernized design. The Juwel 18 L with its compact dimensions has been developed especially for those customers, who dispose of limited machine space. It is, however, also an economical alternative for all applications where a sheeter only is required, which can also be equipped with accessories for the production of breakfast-rolls, this means that these models are suitable for confectioner's shops and bakeries. It is also possible to combine long and short working tables. The new Juwel generation takes full account of potentially dangerous points of dough sheeters in the bakery. Effectively fitted guards and new heavy roller castors ensure the required safety and stability.

2 technical data

Performance data	
Drive	0,75 KW
Weight	280 kg

Dimensions	
Working width	800 mm
Width	590 mm
Length	2.900 mm
